### Vario 4 series

#### to see with different eyes.

# The compact braille display for home and office

The elegant and easy to use Vario 4 Braille displays are among the smallest and lightest Braille output devices. The 3 models of our Vario 4 family are for equipping a private workplace, also ideal in a professional environment. You can choose between 40, 64 or 80 Braille elements. All displays of Vario 4 series are available as a Human Interface Device (HID) and with reversible USB Type C port – You cannot insert the plug incorrectly – particularly user-friendly!

- Compact, lightweight and elegant
- maximum ease of use
- Human Interface Device (HID)
- New USB Type C port
- Braille elements with cursor routing
- Practical function keys
- Stable housing and high-quality design

## Vario 4 series

Vario 4 impresses with its simplicity functional design. It has the typical key features of our high quality Braille displays. The 40, 64 or 80 Braille elements are embedded in a solid aluminum housing. It is operated using the six function keys. Vario 4 is so energy efficient that it doesn't have one Battery required, nor the battery of a connected one Notebooks noticeably stressed. The Braille display allows easily connect to a PC or notebook:

Vario 4 is simply plugged into the PC and automatically recognized by the operating system. The Installation of a device driver is not necessary.

Use with your desktop or laptop PC.
